

7- HOW CAN I SEARCH FOR A SPECIFIC PRODUCT?

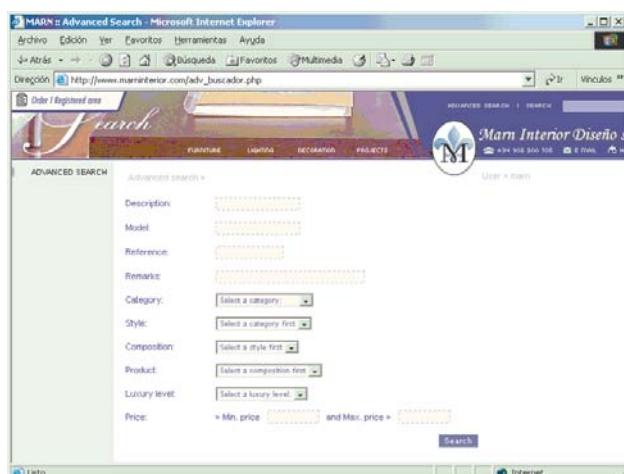

There are two ways of performing specific searches: the predictive search and the advanced search.

Predictive searching: ideal for finding results related to a word or specific set of letters. The system returns all the products that coincide with the object of the search in the following fields: name, reference or category. This search mode is recommended when you are looking for a product and you know its reference or name.

The image contains two side-by-side screenshots of the Marn Interior website. The left screenshot shows the homepage with a large 'Search' button highlighted by a red box. The right screenshot shows a search results page for the term 'adida', with the search bar also highlighted by a red box.

Advanced search: This search mode enables the filtering of results by different criteria. It is a fast way of finding a specific group of products..

The image shows the 'Advanced Search' page of the Marn Interior website. It features a form with multiple dropdown menus and input fields for filtering search results. The fields include 'Description', 'Model', 'Reference', 'Remarks', 'Category', 'Style', 'Composition', 'Product', 'Luxury level', and 'Price' (with 'Min. price' and 'Max. price' fields). A 'Search' button is at the bottom right.
